ECE 421/521 Analog Design I Study Guide 2 December 2013

Quotes of the Week: Barrie Gilbert: “The transistor doesn’t know what it’s supposed to do.” Wes Hayward: “The Simulation is the greater experiment.”

Tasks for this week:

Work on Project

Write up a brief project status report and hand in a paper copy by Wednesday this week. This is to help me keep track of what everyone is doing.

Project Status: ONE Page, one side. Your Name ________________________

A drawn schematic of your project.

A photograph or sketch of your construction method.

A brief description of how it works.

The current status.

Projects need to be done by Thursday of Finals Week, so there is still time to work. The Project Status report is not a final report on the finished project, it’s just an honest statement of current status.
