Environmental Cleanup and Restoration
CE/ESR 410/510
Preview of Prep Check 9

2.5 points each:

1. According to the reading on a pump and treat system in Kent, WA, what was the cost of cleanup per pound of contaminant removed? [List of $ per pound to choose from]

2. True or false? At the Kent, WA site, pump and treat was successful after 8 years and the site (both on and off site) was deemed to be fully restored.

3. At the Kent, WA site, approximately how many gallons of water were pumped from the ground during the P&T remediation process?

4. True or false? At the Kent, WA site, although TCE levels dropped by two orders of magnitude during the remediation, the TCE concentration remained at over 50,000 mcg/L.
