

MIDTERM 2011

The study guide already up is accurate for the 2011 closed book, but I will provide any equations or tables needed. I will not expect you to memorize lists of diseases and chemicals, but you should be able to spot to “correct” disease of chemical from out of a list of choices. I will not expect you to memorize molecular weights.

Know how to use the “8.34” factor in calculations of lb/day.

Know the basic differences in the behavior of particles in Type I, II, and III sedimentation.
