

Homework 9 – SolidWorks Tutorial:

For homework 9, you will need to complete a tutorial that guides you through modeling a part and creating a drawing from the resulting part. Remember that it may take more than one attempt to finish the drawing. You may need to start over several times, or you may need to redo some of the features that you create. This is all part of the learning process. You will learn SolidWorks by practice, which will invariably involve trial and error. Don't be afraid to experiment on your own. Try drawing your own part after finishing the tutorial. It may take you longer than the "30 minute" estimated on the tutorial.

To begin, click on the SolidWorks icon on your desktop or from the start menu.

Click the "Getting Started" link below and then click the "30 Minute Lesson" link to begin the tutorial.

Tutorials by Category	
Getting Started	Special Types of Models
Building Models	Productivity Enhancements
Working with Models	Design Analysis
All SolidWorks Tutorials	

30 Minute Lesson
AutoCAD and SolidWorks
Lesson 1 - Parts
Lesson 2 - Assemblies
Lesson 3 - Drawings

Next, just follow the instructions to complete the tutorial (and your homework)!
