

ECE 312 Final Exam Study Guide

This 90-minute exam is scheduled for Tuesday, March 15th.

The exam begins at 0800. 

The exam will cover material from all chapters in the textbook we covered. There will also be material related to digital filtering.

The exam is closed book/closed notes.

You may have two (2) 8.5 x 11 inch pages of notes. Both sides of these two pages may be used.

You will not need to put Fourier transform tables, Z-transform tables or integrals on your notes.

Be sure to bring a calculator. You will need one during the exam. Note I said a **calculator**—not a laptop or some other electronic device with a calculator app installed in it.

You will also be asked concepts.

I will not be asking you anything related to Figure 11-5 in the textbook.

The exam format will be similar to that used on the 2nd exam. That is, I will give you a set of questions and you get to pick which ones you want to do.

Finally, **DO FORGET TO BRING A CALCULATOR.**
