

unlink Program

```
int main(int argc, char *argv[ ])
{
    int rc;

    if (argc != 2) {
        fprintf(stderr, "Usage: %s <file>\n", argv[0]);
        return -1;
    }

    rc = unlink(argv[1]);
    if (rc < 0) {
        fprintf(stderr, "Error: %s\n", strerror(errno));
        return -1;
    }

    return 0;
}
```
