

Administrative (Sep. 29)

- Cat Fall 2005 Workshop: Oct. 5 - 7 (next week)
<http://www.cat.pdx.edu/tutors/fall-2005-workshops.html>
- Subscribe to class mailing list (if you haven't done so)
- A few clarifications about our environment
 - Accounts
 - login name: @cs.pdx.edu is NOT the same as @pdx.edu
 - Machine: linuxlab.pdx.edu is NOT the same as odin.cs.pdx.edu
 - You need to run your programs on linuxlab.cs.pdx.edu
 - Get an account from CAT lab (if you don't have it yet)
 - See <http://www.cs.pdx.edu/~suhui/classes/cs200/help.html>
 - Then you'll have an email address <login name>@cs.pdx.edu
 - You'll also have an access to linuxlab.cs.pdx.edu

CS 200, Chiang, PSU, Fall 2005

Login from a windows machine

- You can use an ssh client, such as putty, ssh Secure Shell, secureCRT
 - They allow you to login to a unix machine over a network
- Once you login a remote unix computer, it's as if you were in the lab where the remote computer is (some limitation: don't do anything that involves opening a window b/c it's painfully slow)
- Any command you run in the ssh client while you log in is executed on the remote unix computer
 - this includes sending emails (people will see your unix address, not your local windows)

CS 200, Chiang, PSU, Fall 2005

Email - Pine on Unix

- Example: suppose the file you want to send is under ~/
- (1)

```
To : cs200shc@cs.pdx.edu
Cc :
Attchmnt: ~/suhui.tar
Subject :
----- Message Text -----
```

(2)

```
To : cs200shc@cs.pdx.edu
Cc :
Attchmnt: 1. ~/suhui.tar (10 KB) ***
Subject : dueA1, suhui, Chiang
----- Message Text -----
```

If the file size is not shown, pine doesn't find the file

- You don't need to type anything in the body when submitting assignments
- Hit Ctrl-x to send the email
 - You'll be prompted for confirmation (follow instruction from pine)
- Hit Ctrl-c to cancel the message at any time if necessary
- Hit "q" to quit pine (when you're not composing the email)

CS 200, Chiang, PSU, Fall 2005

Pine (cont.)

- A few basic commands for editing Attachment and Subject lines
 - To delete the file name on the Attachment line, hit Ctrl-k
 - To delete a character on the Subject line, hit Ctrl-d, use arrows to move the cursors
- When viewing a list of emails
 - Use up or down arrows to move the cursor to the message you want to view, and hit return to read the selected message
 - To return to the list of emails again, use "<"
- When reading a message
 - Hit "p" to go to the previous message
 - Hit "n" to go to the next message
 - Hit "l" to return to the list of emails
 - Hit "r" to reply
- To save an attachment
 - choose the message and hit return, then hit "v" (w/o quotes)
 - Move cursor to the file you want to save, then hit "s"
 - Pine will ask "SAVE: Copy attachment to file in current directory:<name>"
 - Hit return to accept the name, or edit the name first
 - If pine ask whether to append or overwrite the file, it means you've already had a file with the same name
- Read manual for other features (editing body, filing emails to folders)
