

TOYS-4-TECHS (T4T) LICENSE AGREEMENT VERSION 1.0

Toys4Techs (T4T) 1.0

Spirit of the License:

This license is designed to encourage the free exchange of information and knowledge. It is our opinion that Intellectual Property, Patents, and Copyrights slow the development of technology and design. While these forms of intellectual control allow a higher chance of making a profit in the Capitalist nations, it is our belief that it would be better for the society, as a whole, if the information and designs protected by this license were widely available to the public. While there are many licenses available, from Public Domain to BSD to GPL to Proprietary, we feel that some individuals and corporations take advantage of said licenses without helping the community in return. The least restrictive licenses, like Public Domain and BSD, provide their information to the public at large, but are commonly consumed by Proprietary corporate software that do not contribute back to the community. The most restrictive licenses, like GPL, have the undesired side effect of everyone reinventing the wheel so as to keep their licensing options open. Proprietary licenses impede the growth of technology and knowledge, by not allowing the community to learn from their mistakes, again leading to reinvention of the wheel. It is our hope that, one day, all non-personal information will be freely available to all, regardless of possible profit margins or nations of origin.
