Haskore

- **Haskore is a Haskell library for constructing digital music**
  - **It supports an abstract high-level description of musical concepts**
  - **Maps into the Midi (Musical Instrument Digital Interface) standard**
    » **a low-level binary bit based encoding of music**
    » **can be "played" by "Media-Players"**

Duration & Absolute Pitch

```
type Dur    = Ratio Int
```
  – **fractions of Integers such as 3 /4. We write `(3 % 4)` in Haskell.**

```
type AbsPitch = Int
```

```
absPitch :: Pitch -> AbsPitch
absPitch (pc,oct) = 12*oct + pcToInt pc
```

Pitch to integer

```
pcToInt :: PitchClass -> Int

pcToInt pc = case pc of
        Cf -> -1    -- should Cf be 11?
        C  -> 0  ;  Cs -> 1
        Df -> 1  ;  D  -> 2 ;  Ds -> 3
        Ef -> 3  ;  E  -> 4 ;  Es -> 5
        Ff -> 4  ;  F  -> 5 ;  Fs -> 6
        Gf -> 6  ;  G  -> 7 ;  Gs -> 8
        Af -> 8  ;  A  -> 9 ;  As -> 10
        Bf -> 10 ;  B  -> 11 ; Bs -> 12 -- maybe 0?
```

Note how several different pitches have the same absolute pitch. This is because the "flat" of some notes is the "sharp" of another.

From `AbsPitch` to `Pitch`
```
pitch12 = [C,Cs,D,Ds,E,F,Fs,G,Gs,A,As,B]
pitch    :: AbsPitch -> Pitch
pitch a = (pitch12 !! mod a 12, quot a 12)
```

```

Given an **`Octave`** creates a function from **`Dur`** to **`Music`** in that octave.
  Note that **`Note :: Pitch -> Dur -> Music`**

These functions have the same names as the constructors of the
  `PitchClass` but they're not capitalized.

Generic Music - Rests

```

          m2' = cut (d - dur m1') m2
      in m1' :+: m2'
```

Comments

- `Music` **is a high level abstract representation of music.**

- **Its analyzable so we can do many things with it**
  - First, we can play it
  - But we can also
    - » compute its duration (without playing it)
    - » reverse it
    - » scale it's Tempo
    - » truncate it to a specific duration
    - » transpose it into another key

Percussion

```

Let's beat the drums

```

perc ps = Note (pitch (fromEnum ps + 35))

funkGroove
  = let p1 = perc LowTom          qn
        p2 = perc AcousticSnare en
    in Tempo 3 (Instr Percussion (cut 8 (repeatM
        ( (p1 :+: qnr :+: p2 :+: qnr :+: p2 :+:

```

Music Presentation

- **Music is a highlevel, abstract representation**
- **We call the playing of Music its Presentation**
- **Presentation requires "flattening" the Music representation into a list of low level events.**
  - **Events contain information about**
    - » **pitch**
    - » **start-time**
    - » **end-time**
    - » **loudness**
    - » **duration**
    - » **instrument etc.**
- **The MIDI standard is a file format to represent this low level information.**
- **Presentation is the subject of the next lecture.**
