Assignment 2

Requirements Analysis

Statement of Work

In the previous deliverable we focused on eliciting the client’s needs by using scenarios and then we specified those needs through use cases. In this deliverable we will work on analyzing those specifications to help us better understand the system.

Required Deliverables

From the set of use cases and actor definitions in your requirements elicitation and specification deliverable you must provide the following for this deliverable:

1. Class diagrams for the analysis object model

2. Sequence diagrams for the more complex use cases.

3. State diagrams for objects with nontrivial behavior.

Moreover, you must prepare a 5-minute presentation that will be presented to the client.

Due Dates

Your group must turn in the deliverable by May 2nd, 2017. Late submissions will not be accepted.

Guidelines

• Use your existing template from the first deliverable.

• The document should contain the name of the group and all group members.
